Aker Solutions □ fully integrated subsea control systems are reliable, robust and built upon commercially available building blocks. The systems combine topside controls, hydraulic and electrical power units and subsea control modules to allow systems on the seafloor to be operated from the surface. Highly Adaptable Systems

engineer the products, systems and services required to unlock energy. Our goal is to maximize recovery and efficiency of oil and gas assets, while using our expertise to develop the sustainable solutions of the future.

Aker Solutions | Aker Solutions

The well control systems from Aker Solutions are designed to connect to any subsea tree and allow for safe operations at any depth and in any condition. With high capacity cutting and sealing valves and high angle disconnect capacity – all controlled by electro hydraulic signals – the well control systems are at the forefront of safety and reliability in the market.
