Aquaponic gardening is a great method for raising fish and vegetables together. Aquaponic farming is a sustainable and commercially profitable way of organic farming. The waste of the fish will get converted by bacteria to nitrates, which the plants will feed on. It ' s a closed loop system. In the beginning you need to test your water frequently but after a few weeks, it doesn ' t need much maintenance anymore. The fish waste will almost create all the nutrients except a few which you will have to add yourself.

Aquaponics is the combination of more traditional food production methods and uses both aquaculture and hydroponics in order to grow food naturally for personal consumption. Aquaculture is based on raising fish while hydroponics is based on raising vegetables in water. Aquaponics uses both methods to provide the essential elements for each to be successful. One of the best features of aquaponics is the inherent benefits it contains in providing protein and vegetables for a well-balanced food source - all at the same time.In Aquaponics for Beginners you will discover: - The basics of aquaponics - Common mistakes people make in aquaponics- Types of aquaponics systems- Best plants, fish for aquaponics- How to maintain your system?...And much more!!! Aquaponic Gardening: A Step by Step Guide for Beginners This book will give you an insight on how to produce organic vegetables which are free from pesticides, insecticides or any sort of harmful chemicals which are injected or absorbed by the plants during their growth in farms or fields and breed fish together. Aquaponic Gardening is a basic three system function which helps you to grow vegetables and breed fish at the same time; it's one of those things which you can do in your own backyard. It consists of breeding fish in a tank, using the waste of the fish as a fertilizer for the vegetables and then the same water that is provided to the plants is used by the fish. We can basically say that Aquaponic is the integration of Aquaculture i.e. the breeding of fish and Hydroponics i.e. growing of plants in water without soil. Scientifically said, Aquaponic is a food production system which involves Aquaculture and Hydroponics in a symbiotic environment. Hence, after going through this book you'll be able to find yourself in an easy position to make your own Aquaponic Garden and can always have yourself a fish and veggie dinner at any time.
