Large population displacement in developing economies due to internal armed conflict and violence is of international concern. There has been relatively little research on the long-term consequences of displacement on older adult health among populations characterized by rapid demographic, epidemiological, and nutritional transitions during the 20 th century.

Displacement due to armed conflict and violence in ...
The hardship they endure is often so extreme it threatens their survival. In armed conflict, displacement is frequently caused by violations of international humanitarian law (IHL) or fundamental human rights. Indeed, were existing laws adhered to most people dis- placed by violence would be able to remain at home.

internal displacement in armed conflict
More than 1 in 10 children worldwide are affected by armed conflict. The effects are both direct and indirect and are associated with immediate and long-term harm. The direct effects of conflict include death, physical and psychological trauma, and displacement. Indirect effects are related to a large number of factors, including inadequate and unsafe living conditions, environmental hazards, caregiver mental health, separation from family, displacement-related health risks, and the ...
