In the most successful Japanese battleship action of the war, this action killed 41 defenders and put the airfield out of action for about 12 hours. During the First Naval Battle of Guadalcanal , battleships Hiei and Kirishima attempted a second bombardment of Henderson Field but were driven off by a force of U.S. cruisers and destroyers.

"This book details more than 400 kamikaze attacks performed by Japanese aircraft, manned torpedoes, suicide boats and suicide swimmers against U.S. ships during World War II. Part One focuses on the traditions, development and history. Part Two details the kamikaze attacks on ships. Appendices list all of the U.S. ships suffering kamikaze attacks"--Provided by publisher.

Designed with the more visual needs of today's student in mind, this landmark encyclopedia covers the entire scope of the Second World War, from its earliest roots to its continuing impact on global politics and human society. Over 1,000 illustrations, maps, and primary source materials enhance the text and make history come alive for students and faculty alike. ABC-CLIO's World War II: A Student Encyclopedia captures the monumental sweep of the "Big One" with accessible scholarship, a student-friendly, image-rich design, and a variety of tools specifically crafted for the novice researcher. For teachers and curriculum specialists, it is a thoroughly contemporary and authoritative work with everything they need to enrich their syllabi and meet state and national standards. Ranging from the conflict's historic origins to VJ Day and beyond, it brings all aspects of the war vividly to life—its origins in the rubble of World War I, its inevitable outbreak, its succession of tumultuous battles and unforgettable personalities. Students will understand what the war meant to the leaders, the soldiers, and everyday families on home fronts around the world. Featured essays look at Pearl Harbor, the Holocaust, the atomic bomb, and other crucial events, as well as fascinating topics such as signals intelligence and the role of women in war. A separate primary source volume provides essential source material for homework, test preparation or special projects. With a wealth of new information and new ideas about the war's causes, course, and consequences, World War II will be the first place students turn for the who, what, when, where, and—more importantly—the why, behind this historic conflict. 950 A–Z entries, including lengthy biographies of individuals, studies of battles, details of weapons systems, and analyses of wartime conferences—all of the topics students look for, and teachers and educators need to have for their classes Over 270 contributors, including an unprecedented number of non-U.S. authorities, many from Japan and China, giving students a truly global understanding of the war An inviting design incorporating 600 photographs, including contemporaneous images of individuals, scenes from the front lines, posters, and weapon technologies A separate primary source volume offering a wide array of materials ranging from official documents to personal correspondence An early section of 70 detailed geopolitical and military maps, show students the basic sweep of the war

While the overriding image of the First World War is of the bloody stalemate on the Western Front, the overall shape of the war arose out of its maritime character. It was essentially a struggle about access to worldwide resources, most clearly seen in Germany's desperate attempts to counter the American industrial threat, which ultimately drew the United States into the war. This radical new book concentrates on the way in which each side tried to use or deny the sea to the other, and in so doing describes rapid wartime changes not only in ship and weapons technology but also in the way naval warfare was envisaged and fought. Melding strategic, technical, and tactical aspects, Friedman approaches the First World War from a fresh perspective and demonstrates how its perceived lessons dominated the way navies prepared for the Second World War.

This is an in-depth study of the battle of Midway that reviews the many previous accounts and compares their accuracy and veracity with fresh documentation that has been released recently, including new material on the post-war analysis made by a US select committee. There are new viewpoints on the muddle among the US Admirals; the total failure of the USAAF, despite elaborate claims; fresh thinking on the part played by the US Navy Dauntless dive-bombers in the action; the mystery of the carrier Saratoga's presence; Hollywood's totally wrong take on the battle in all the films since made about it. Also, included are new eyewitness accounts the author has obtained and information from Japanese sources that has never been previously published. The lengthy Appendices will include statistical details of the ships, the planes and the men.

An alphabetical arrangement of the ships of the continental and United States Navies, with a historical sketch of each one.
