The World Economy

# Access Free Capitalism And The World Economy

Capitalism is an economic system where private entities own the factors of production. The four factors are entrepreneurship, capital goods, natural resources, and labor. 1 ?

The owners of capital goods,

natural resources, and  
entrepreneurship exercise  
control through companies.  
Individuals own their labor.  
The only exception is  
slavery, where someone else  
owns a person's labor.

Many individuals proclaim that global capitalism is here to stay. Unfettered markets, they argue, now drive the world, and all countries must adjust, no matter how painful this may be for some. Robert Gilpin,

# Access Free Capitalism And The World Economy

author of the widely  
acclaimed Political Economy  
of International Relations  
(Princeton, 1987), urges us,  
however, not to take an open  
and integrated global  
economy for granted. Rather,  
we must consider the

Gilpin's new book amounts to a magisterial inquiry into all major aspects of the
