tionship between chemistry and matter. You will recognize how scientific methods can be used to solve problems. You will distinguish between scientific research and technology. Why It's Important You, and all the objects around you, are composed of matter. By studying matter and the way it changes, you will gain an understanding of your body

Chapter 1: Introduction to Chemistry  
The physical world is made of atoms and molecules. Even large objects can be viewed as a combination of small particles. Energy causes particles to move and interact physically or chemically. Those interactions create a variety of substances. As molecules undergo a chemical or physical change, the number of atoms in that system remains constant.
