manifestations of simplification, including tax systems, tax law, taxpayer communications and tax administration.

They also review the longer term or more fundamental approaches to simplification, suggesting that in order to strike the

South Africa, Thailand, Turkey, the UK and the US, the authors illustrate differences between jurisdictions and the changing environment in which they operate. This book addresses the crucial balance between simplicity and the other objectives of tax design and reform,

and suggests that reformers of the tax system should include simplicity as one of the key evaluators of any design or reform proposal.
