Strawbale Essentials - Australasian Straw Bale Building ...
Straw is a waste product; it cannot be used for feed, like hay, and much of it is burned at the end of the season. Using straw for building reduces air pollution and stores carbon. The straw left over from building can be used as mulch so that, overall, there is minimal waste from using the material (see Waste minimisation).

Straw bale | YourHome
You can build a moveable small building on a low-loader wheeled base. You can also build a high quality strawbale building that can be classed as temporary, because it could be taken down again easily if required, but the same building could also last for 200 years. What else can be built with straw? Straw has been put to many uses.

Frequently Asked Questions - Straw Works
Although originally intended to go in from the outside, he had to devise a way of doing it from inside, which actually worked better in the end. The cost of this kit would be somewhere around £ 30,000 (US\$50,000) and Brian has registered the design and has patents pending on some elements of it.
