Modern cars are more computerized than ever. Infotainment and navigation systems, Wi-Fi, automatic software updates, and other innovations aim to make driving more convenient. But vehicle technologies haven’t kept pace with today’s more hostile security environment, leaving millions vulnerable to attack. The Car Hacker’s Handbook will give you a deeper understanding of the computer systems and embedded software in modern vehicles. It begins by examining vulnerabilities and providing detailed explanations of communications over the CAN bus and between devices and systems. Then, once you have an understanding of a vehicle’s communication network, you’ll learn how to intercept data and perform specific hacks to track vehicles, unlock doors, glitch engines, flood communication, and more. With a focus on low-cost, open source hacking tools such as Metasploit, Wireshark, Kayak, can-utils, and ChipWhisperer, The Car Hacker’s Handbook will show you how to: –Build an accurate threat model for your vehicle –Reverse engineer the CAN bus to fake engine signals –Exploit vulnerabilities in diagnostic and data-logging systems –Hack the ECU and other firmware and embedded systems –Feed exploits through infotainment and vehicle-to-vehicle communication systems –Override factory settings with performance-tuning techniques –Build physical and virtual test benches to try out exploits safely If you’re curious about automotive security and have the urge to hack a two-ton computer, make The Car Hacker’s Handbook your first stop.

Autonomous vehicle technology has the potential to significantly improve social welfare. This report addresses the numerous legislative, regulatory, and liability issues this technology will raise.

Do you like fast trucks and loud engines? How about buckets of mud flying in all directions? If yes, then mud truck racing is for you! Big trucks tear through mud bogs on their way to glory. Bog racing is not for the faint of heart or for people who like to stay clean. The mess and thrill of mud truck races will make you glad to get dirty.Enter the Dirt and Destruction Sports Zone to learn about the history, organizations, technology, and the important drivers connected to mud truck racing. You’ll learn:- How much water, sand, and dirt are used to make mud bogs.- Which driver finished a 200-foot (61-meter) mud race in just 2.110 seconds.- How drivers have upgraded engines and fuel to give trucks more horsepower.- How mud truck racing started and who the best drivers are.Are you into sports? Then get in the zone!
