Frequently on contract drawings (plans, sections and elevations), finished floor level may be abbreviated 'FFL 27,000', the figure suffixed denoting the level in metres above a defined datum level (usually outside ground level or ground floor level). The floor above may be FFL 31,000 and the floor below FFL 23,000.

Finished floor level - Designing Buildings Wiki

Incidentally I've also noticed that on the plans for other houses built at the same time on my road that they show the FFL as 150mm above ground level. I know this is a requirement for current...

Finished floor level same as ground level - Page 1 - Homes ...

A ground-level floor can be an earthen floor made of soil, or be solid ground floors made of concrete slab. Ground level slab floors are uncommon in northern latitudes where freezing provides significant structural problems, except in heated interior spaces such as basements or for outdoor unheated structures such as a gazebo or shed where unitary temperatures are not creating pockets of ...

Ground Floor Plan Part - 1 (Complete Dimensions)

When an architect makes a plan of a building, he considers the road level as $\pm (0'-0")$. That means the road in front of the plot is considered as $\pm (0'-0")$ level. So, when you see a level mark as $+(4'-0")$ on the ground floor plan of a building, you should build the ground floor 4' above from the road level.

Understanding Level, Floor and Story of a Building - A ...

This 12-unit apartment plan gives four units on each of its three floors. The first floor units are 1,109 square feet each with 2 beds and 2 baths. The second and third floor units are larger and give you 1,199 square feet of living space with 2 beds and 2 baths. A central stairwell with breezeway separates the left units from the right.

80+ Apartment floor plans ideas in 2020 | floor plans ...

In architecture and building engineering, a floor plan is a drawing to scale, showing a view from above, of the relationships between rooms, spaces, traffic patterns, and other physical features at one level of a structure. Dimensions are usually drawn between the walls to specify room sizes and wall lengths. Floor plans may also include details of fixtures like sinks, water heaters, furnaces, etc. Floor plans may include notes for construction to specify finishes, construction methods, or symbols.

Floor plan - Wikipedia

This floor plan shows a ground floor living area in which the well-planned layout offers space for three bedrooms and a large living area. Each bedroom has a private bathroom equipped with a shower, while the family bathroom has a bathtub that is accessible from the hallway. Floor level map. Find floor level requirements for building and resource consents as well as general flood risk and ground level information for a property. The below map replaced the CERA fixed floor level map viewer on 1 March 2017. The information is based on the most recent assessment of flood modelling results and other relevant information and is updated on a regular basis.

Floor level map : Christchurch City Council

So, in the case of the basement level referred to above, it may be given 0.000m as the site datum, in which case (following the logic from above) ground level = 3.250m; ground floor = 4.000m; first floor = 8.000m and so on. The levels usually refer to finished floor levels (FFL) but can also indicate other features e.g finished structural level (FSL)

Datum - Designing Buildings Wiki

A storey is a space within a building between two floor levels or a floor level and a ceiling or roof (click here for BCC's full definition of storey). It is important to note that a basement is not a storey, where no part of it protrudes more than 1 metre above the ground level. For example, a three level building on a sloping site may be considered only two storeys when the basement level (e.g. garage) is 'cut in' to the block and does not protrude more than 1 metre above ground level.
