12:49 pm I can't think of any reason at all that TPMS would affect the Advancetrac. They are totally separate systems that don't even use the same modules. Could just be that during the change they bumped something like a wheel speed sensor that "fixed" it, or could be that one or more of your winter tires are differently sized (more worn) than the others.

The traction off comes on when the abs light is on to show it has been disabled. The traction control uses the abs sytem to help control it.The most common reason that this happens is a bad wheel speed sensor which is all part of a bearing hub assembly. You can also check the wires going to the abs sensors to make sure none of them were damaged.
