These boots are incredible! I had tried boots from various other makers and were not happy with any of them. They were too sloppy, too tight, or even felt cheaper on a more expensive boot. These Guide Gear boots fit well, look good, and don't hurt my feet, even with hours of daily use. Will be purchasing these in black soon.

Motorcycle Gear: The Ultimate Guide to the Safest Helmets, Jackets, Pants, Gloves, Boots, Airbags, and Accessories" is the only comprehensive resource available on the global market to help the rider to identify, buy, and wear the highest quality and safest motorcycle gear. The innovation to both motorcycles and riding gear has taken off in recent years, providing accident and injury mitigating technologies like Antilock Braking Systems, Traction Control Systems, Kevlar, and viscoelastic polymer armor. But just as the R&D into the physical products has taken off, so has the marketing aimed at selling gear and accessories. Manufacturers and retailers alike are guilty of intentionally leading buyers astray in the effort to boost revenue, at our expense. Without spending hundreds of hours understanding the differences in materials, the commonly employed deceptive marketing practices, and simply the wide array of gear out there, how can we be certain that we'll be safe in an accident? The industry has left the riding community to their own devices to make informed buying decisions and that's where our book comes in. We did the research, gathered the information, crunched the numbers, and consolidated the important stuff into a single resource to save you time, money, and skin. Motosafer and this book are founded on the core values of safe riding, educated buying, and industry transparency.
