House district-level polling is being closely monitored by experts, as it was the canary in the Trump coal mine in 2016. Thus far, that polling actually predicts an even bigger Biden victory

The award-winning "Significant Others" columnist shares character portraits of remarkable men and women whose low-profile accomplishments contribute to the running of the nation, from coal miners and oil rig workers to migrant laborers and air traffic controllers.

An Oprah.com "Must-Read Book" Award-winning journalist Jeanne Marie Laskas reveals "enlightening, entertaining, and often poignant"* profiles of America's working class—the forgotten men and women who make our country run. Take the men of Hopedale Mining company in Cadiz, Ohio. Laskas spent several weeks with them, both below and above ground, and by the end, you will know not only about their work, but about Pap and his dying mom, Smitty and the mail-order bride who stood him up at the airport, and Scotty and his thwarted dreams of becoming a boxing champion. That is only one hidden world. Others that she explores: an Alaskan oil rig, a migrant labor camp in Maine, the air traffic control center at LaGuardia Airport in New York, a beef ranch in Texas, a landfill in California, a long-haul trucker in Iowa, a gun shop in Arizona, and the Cincinnati Ben-Gals cheerleaders, mere footnotes in the moneymaking spectacle that is professional football. "Jeanne Marie Laskas is a reporting and writing powerhouse. She doesn't just interview the people who dig our coal and extract our oil, she goes deep into the mines and tundra with them. With beauty, wit, curiosity, and grace, she finds the hidden soul of America. Hidden America is essential reading."—Rebecca Skloot, author of The Immortal Life of Henrietta Lacks

Award-winning journalist Jeanne Marie Laskas dives deep into her subjects and emerges with character-driven stories about the people who make our lives run every day — and yet we barely think of them.

In a devastating and urgent work of investigative journalism, Pulitzer Prize winner Chris Hamby uncovers the tragic resurgence of black lung disease in Appalachia, its Big Coal cover-up, and the resilient mining communities who refuse to back down. Decades ago, a grassroots uprising forced Congress to enact long-overdue legislation designed to virtually eradicate black lung disease and provide fair compensation to coal miners stricken with the illness. Today, however, both promises remain unfulfilled. Levels of disease have surged, the old scourge has taken an aggressive new form, and ailing miners and widows have been left behind by a dizzying legal system, denied even modest payments and medical care. In this devastating and urgent work of investigative journalism, Pulitzer Prize winner Chris Hamby traces the unforgettable story of how these trends converge in the lives of two men: Gary Fox, a black lung-stricken West Virginia coal miner determined to raise his family from poverty, and John Cline, an idealistic carpenter and rural medical clinic worker who becomes a lawyer in his fifties. Opposing them are the lawyers at the coal industry's go-to law firm; well-credentialed doctors who often weigh in for the defense, including a group of radiologists at Johns Hopkins; and Gary's former employer, Massey Energy, the region's largest coal company, run by a cantankerous CEO often portrayed in the media as a dark lord of the coalfields. On the line in Gary and John's longshot legal battle are fundamental principles of fairness and justice, with consequences for miners and their loved ones throughout the nation. Taking readers inside courtrooms, hospitals, homes tucked in Appalachian hollows, and dusty mine tunnels, Hamby exposes how coal companies have not only continually flouted a law meant to protect miners from deadly amounts of dust but also enlisted well-credentialed doctors and lawyers to help systematically deny much-needed benefits to miners. The result is a legal and medical thriller that brilliantly illuminates how a band of laborers — aided by a small group of lawyers, doctors and lay advocates, often working out of their homes or in rural clinics and tiny offices —

challenged one of the world's most powerful forces, Big Coal, and won. A deeply troubling yet ultimately triumphant work, *Soul Full of Coal Dust* is a necessary and timely book about injustice and resistance.

One of the most important politics books of the year, *To Obama* is a record of a time when politics intersected with empathy. 'The real story of Obama's America' *Sunday Times* Every day, President Obama received ten thousand letters from ordinary American citizens. Every night, he read ten of them before going to bed. In *To Obama*, Jeanne Marie Laskas interviews President Obama, the letter-writers themselves and the White House staff in the Office of Presidential Correspondence who were witness to the millions of pleas, rants, thank-yous and apologies that landed in the mailroom during the Obama years. At once desperate, joyful, hateful and despairing, they form an intimate portrait of one man's relationship with the American people, and of a time when empathy intersected with politics in the White House.

A vivid account of "one of the most shocking episodes in organized labor's blood-soaked history" (Steve Halvonik, *Pittsburgh Post-Gazette*). In the early hours of New Year's Eve 1969, in the small soft coal mining borough of Clarksville, Pennsylvania, longtime trade union insider Joseph "Jock" Yablonski and his wife and daughter were brutally murdered in their old stone farmhouse. Behind the assassination was the corrupt president of the United Mine Workers of America (UMWA), Tony Boyle, who had long embezzled UMWA funds, silenced intra-union dissent, and served the interests of Big Coal companies—and would do anything to maintain power. The most infamous crimes in the history of American labor unions, the Yablonski murders catalyzed the first successful rank-and-file takeover of a major labor union in modern US history. *Blood Runs Coal* is an extraordinary portrait of one of the nation's major unions on the brink of historical change.

NEW YORK TIMES BESTSELLER • NOW A MAJOR MOTION PICTURE • Dr. Bennet Omalu discovered something he could not ignore. The NFL tried to silence him. His courage would change everything. "A gripping medical mystery and a dazzling portrait of the young scientist no one wanted to listen to . . . a fabulous, essential read."—Rebecca Skloot, author of *The Immortal Life of Henrietta Lacks* Jeanne Marie Laskas first met the young forensic pathologist Dr. Bennet Omalu in 2009, while reporting a story for *GQ* that would go on to inspire the movie *Concussion*. Omalu told her about a day in September 2002, when, in a dingy morgue in downtown Pittsburgh, he picked up a scalpel and made a discovery that would rattle America in ways he'd never intended. Omalu was new to America, chasing the dream, a deeply spiritual man escaping the wounds of civil war in Nigeria. The body on the slab in front of him belonged to a fifty-year-old named Mike Webster, aka "Iron Mike," a Hall of Fame center for the Pittsburgh Steelers, one of the greatest ever to play the game. After retiring in 1990, Webster had suffered a dizzyingly steep decline. Toward the end of his life, he was living out of his van, tasing himself to relieve his chronic pain, and fixing his rotting teeth with Super Glue. How did this happen?, Omalu asked himself. How did a young man like Mike Webster end up like this? The search for answers would change Omalu's life forever and put him in the crosshairs of one of the most powerful corporations in America: the National Football League. What Omalu discovered in Webster's brain—proof that Iron Mike's mental deterioration was no accident but a disease caused by blows to the head that could affect everyone playing the game—was the one truth the NFL wanted to ignore. Taut, gripping, and gorgeously told, *Concussion* is the stirring story of one unlikely man's decision to stand up to a multibillion-dollar colossus, and to tell the world the truth.

"The most comprehensive and comprehensible history of the West Virginia Coal War I've ever read" (John Sayles, writer and director of *Matewan*). On September 1, 1912, the largest, most protracted, and deadliest working class uprising in American history was waged in West Virginia. On one side were powerful corporations whose millions bought armed guards and political influence. On the other side were fifty thousand mine workers, the nation's largest labor union, and the legendary "miners' angel," Mother Jones. The fight for unionization and civil rights sparked a political crisis that verged on civil war, stretching from the creeks and hollows of the Appalachians to the US Senate. Attempts to unionize were met with stiff resistance. Fundamental rights were bent then broken, and the violence evolved from bloody skirmishes to open armed conflict, as an army of more than fifty thousand miners finally marched to an explosive showdown. Extensively researched and vividly told, this definitive book about an essential chapter in the history of American freedom, "gives this backwoods struggle between capital and labor the due it deserves. [Green] tells a dark, often despairing story from a century ago that rings true today" (*Pittsburgh Post-Gazette*).

Jeanne Marie Laskas had dreams of life on a farm that she couldn't get out of her head. A dream of fleeing her otherwise happy urban life for fresh air and open space. A dream she would discover was about something more profound than that. A dream she never ever expected to come true. Until a hot summer afternoon led to a drive in the country, where a place that had existed only in her fantasies turned out to be real--and for sale. *Fifty Acres And A Poodle* The place is almost too perfect to be believed, but there it is: a pretty-as-a-picture-postcard farm, with an Amish barn, a chestnut grove, and vistas so beautiful, they take her breath away. And in that moment she knows that this is the spot where her future begins. So she drags her boyfriend Alex, a committed urban dweller with zero agricultural awareness who owns a poodle, into her scheme, hoping that love will somehow conquer all. But buying a postcard--fifty acres of scenery--and living on it are two entirely different matters. The questions seem endless: How long before the barn roof collapses? Should they buy sheep? Will the place be good for her writing, and for her relationship with Alex? And is there any way to keep Betty the mutt and Marley the poodle from rolling in mud, leaves, and unidentified smelly remains? In this funny yet tender tale, Laskas shares what happens when you follow your dream--and what happens when it's almost snatched away. *Fifty Acres and a Poodle* is a charming and surprisingly poignant memoir of Jeanne Marie Laskas's first year on Sweetwater Farm. It is a journey peopled by unforgettable characters: Billy, the local contractor who bulldozes her briars, takes her shopping for tractors, and advises her on buying a mule; Tim, the FedEx driver whose truck becomes Marley's obsession and nearly his downfall; the local hunters who present her with an entire wardrobe of blaze-orange hats; and Bob the cat, whose valiant fight for life gives her the courage to love. Jeanne Marie Laskas writes with exhilarating wit and extraordinary wisdom about life, love, and finding your true self on a farm. It's hard to say how a dream forms. Especially one like mine, which at first seemed so utterly random. It could have been a sailing-a-boat-to-Tahiti dream, a quit-your-job-and-hitchhike-to-Alaska dream. It was a fill-in-the-blank dream, born of an urge, not content. An urge for something new. I was thirty-seven years old. I lived on Eleventh Street, the last house on the right, in South Side, a gentrified old mill town on the banks of the Monongahela River. I rented an office in downtown Pittsburgh, a fifteen-minute bike ride away, which is where I spent my days writing stories and magazine articles. I had a garden. I had a cat. I had a dog. And I had a farm dream, a fantasy swirling around in my head about moving to the country. Where in the world was this coming from? That's what I wondered. It might have made sense if I was a miserable person, sick of my life. But I was not. I had a good life; it had taken me a long time to get it that way. A farm dream would have made sense, I supposed, if I was at least the farm dream type. A person with some deep personal longing to churn butter. A person who had had city life forced upon her and now was determined to go be true to herself and live among the haystacks. A person who wore her hair in long braids, used Ivory soap, and liked to stencil her walls with pictures of little chickens and cows. A person who, at minimum, had a compost pile in her yard where she diligently threw lawn clippings and coffee grounds and eggshells and earned the right to use the word organic a lot. But I was not that person. I was not even sure what hay was, or why anyone would stack it. And if I composted anything, it was only by mistake.

Coal is nature's gift to mankind. Be it for cooking food in a poor person's house or for lighting millions of homes across many countries in the world, it is occupying a position of pre-eminence. This book is about dreams coming true, about taking initiatives, about hard earned success in implementing state of the art technologies, about human approach and passion for work. It's about transparency, dedication to duty and overall living up to the tenets of trusteeship as espoused by the great father of Indian nation, Mahatma Gandhi.
