Encircling 2 continues Carl Frode Tiller ' s " poised and effective Rashomon-style exploration of multiple psyches " (Kirkus Reviews) Book two of The Encircling Trilogy continues piecing together the fractured identity of David, the absent central figure who has lost his memory. Three very different friends write letters about his childhood on the backwater island of Otter øya. Ole, a farmer struggling to right his floundering marriage, recalls days in the woods when an act of pretending went very wrong. Tom Roger, a rough-edged outsider slipping into domestic violence, shares a cruder side of David as he crows about their exploits selling stolen motorcycles and spreads gossip about who David ' s father might be. But it is Paula, a former midwife now consigned to a nursing home, who has the most explosive secret of all, one that threatens to undo everything we know about David. With a carefully scored polyphony of voices and an unwavering attention to domestic life, Carl Frode Tiller shows how deeply identity is influenced by our friendships. The Encircling Trilogy is an innovative portrayal of one man ' s life that is both starkly honest and unmergingly true.

Calcium plays an enormous and varied role in living systems now widely appreciated by clinicians. Calcium in Internal Medicine demonstrates the physiological significance of calcium in clinical medicine and discusses the abnormal calcium metabolism in disorders such as renal failure, hypertension, atherosclerosis and osteoporosis. Hirotoishi Morii (Editor) linked the clinical use of vitamin D analogues in bone diseases. Yoshiki Nishizawa (Editor) researched the connection between calcium metabolism and atherosclerosis and Shaul G. Massry (Editor) was the first to systematize the importance of excess PTH in chronic renal failure. In addition to these areas, Calcium in Internal Medicine covers basic physiology, pathophysiology, nutritional requirements and the role of calcium in the development and treatment of other various diseases. The importance of calcium and its regulatory systems is brought together in one publication providing a useful reference tool for internists, rheumatologists and endocrinologists.

This 9th edition features a major new case study developed to help illuminate the complexities of shafts and axles.

This book fifth edition of Pediatric Nephrology has been important advances of the mechanisms and management of various renal disorders in children have taken place since the previous edition of this book. These have been incorporated and the contents extensively revised. Several new authors, having many years of clinical and investigative experience in the area of their expertise, have contributed. The chapters on electrolyte and acid-base disorders, nephrotic syndrome, acute kidney injury, urinary tract infection, tubulopathies, chronic kidney disease, renal replacement therapy, voiding disorders and neonatal renal problems have been expanded and provide most recent information, particularly concerning management of related diseases. A small section on prevention of kidney diseases has been added. The emphasis remains on renal function and its derangement, diagnostic evaluation and treatment of important conditions.

More than 60 papers written by internationally recognized experts cover the broad spectrum of brain edema. The main topics treated are: ischemia & hemorrhage, trauma (experimental and clinical), cerebral hemorrhage, tumor, hydrocephalus & intracranial pressure (ICP), neuromonitoring & neuroimaging, treatments, blood brain barrier, and miscellaneous.

In Separate Pasts Melton A. McLaurin honestly and plainly recalls his boyhood during the 1950s, an era when segregation existed unchallenged in the rural South. In his small hometown of Wade, North Carolina, whites and blacks lived and worked within each other's shadows, yet were separated by the history they shared. Separate Pasts is the moving story of the bonds McLaurin formed with friends of both races—a testament to the power of human relationships to overcome even the most ingrained systems of oppression. A new afterword provides historical context for the development of segregation in North Carolina. In his poignant portrayal of contemporary Wade, McLaurin shows that, despite integration and the election of a black mayor, the legacy of racism remains.

Editors Altan (Ohio State University), Ngaile (North Carolina University), and Shen (Ladish Company, Inc.) offer this extensive overview of the latest developments in the design of forging operations and dies. Basic technological principles are briefly reviewed in the first two chapters.
