How to Use Images? To add images on a canvas, the `getContext("2d")` object has built-in image properties and methods. In our game, to create the gamepiece as an image, use the component constructor, but instead of referring to a color, you must refer to the url of the image.

Game Tutorial - W3Schools

Drag the W3Schools image into the rectangle. Drag and Drop. Drag and drop is a very common feature. It is when you "grab" an object and drag it to a different location. Browser Support. The numbers in the table specify the first browser version that fully supports Drag and Drop. API;

HTML Drag and Drop API - W3Schools

Definition and Usage. The `<iframe>` tag specifies an inline frame.. An inline frame is used to embed another document within the current HTML document. Tip: Use CSS to style the `<iframe>` (see example below). Tip: It is a good practice to always include a title attribute for the `<iframe>`. This is used by screen readers to read out what the content of the `<iframe>` is.
