Grundfos has taken the lead on a distributed pumping
application in HVAC systems. This new method of distributing
chilled water in buildings is an alternative to the conventional
approach, designed to remove issues including Low delta-T,
flow and temperature imbalance, and high commissioning
costs which have plagued traditional distribution schemes.

Distributed pumping solutions represent a new paradigm in ...
This five-hour course discusses the history of chilled water distribution systems and the development of "variable primary flow system." Problems such as low delta-T syndrome associated with the chilled water pumping schemes are defined and discussed and finally, this course compares the advantages and disadvantages of primary-secondary and direct-primary pumping schemes.
