This document presents witness' testimonies and supplemental materials from the congressional hearing called to examine the issue of automotive safety. In her opening statement, Chairwoman Patricia Schroeder briefly reviews statistics on traffic accidents and identifies the two major issues to be addressed in the hearing: failure to act by the National Highway Traffic Safety Administration (NHTSA) and the use of safety belts. It is emphasized throughout the hearing that representatives from NHTSA refused to appear at the hearing; the absence of representatives from the trucking and automobile industries is also noted. Witnesses providing testimonies include: (1) Byron Bloch, a consultant on auto safety design, who briefly reviews the history of NHTSA and demonstrates the danger of "windowshade" seat belts (seat belts with too much slack in the shoulder belts), automatic shoulder belts, and truck underride; (2) Joan Claybrook, the president of Public Citizen; who describes

safety systems which she feels should be standard equipment in all vehicles; (3) Benjamin Kelley, the president of the Institute for Injury Reduction; who addresses the issue of "windowshade" seat belts; and (4) Brian O'Neill, the president of the Insurance Institute for Highway Safety, who reviews the history of manual and nonmanual automatic restraints and the safeguards in place to prevent truck underride. Letters, prepared statements, and supplemental materials are included from Representative Schroeder, the witnesses, the American Trucking Association, Inc., and Jerry Ralph Curry, from the National Highway Traffic Safety Administration. This book demonstrates what kind of problems, originating in a management accounting setting, may be solved with game theoretic models. Game theory has experienced growing interest and numerous applications in the field of management accounting. The main focus traditionally has been on the field of non-cooperative behaviour, but the area of cooperative game theory has developed rapidly and has received increasing attention. Intensive research, in combination with the changing culture of publishing, has produced a nearly unmanageable number of publications in the areas concerned. Therefore, one main purpose of this volume is providing an intensive analysis of the intersection of these areas. In addition, the book strengthens the relationship between the theory and the practical applications and it illustrates the two-sided relationship between game theory and management accounting: new game theoretic models offer new fields of applications and these applications raise new questions for the theory.
