This book examines the role of tax policy in the incidence of socio-economic inequality. With a focus on Latin American, the author demonstrates that while inequality has decreased remarkably in the last decade – during the very period in which inequality was increasing almost everywhere else in the world – this reduction cannot be attributed to a better use of tax policy. Offering both quantitative and qualitative reviews of tax policies pursued by Argentina, Chile, Colombia, Mexico and Peru over the last two decades, Reducing Inequality in Latin America contends that these countries continue to make insufficient use taxation measures in combating startlingly high levels of inequality. Drawing on legal texts, interviews with researchers and experts in the field, and official monetary statistics to obtain a complete picture of how discretionary tax policy has been pursued in the region, this volume engages with a range of recent economic theories to argue for the importance of using the tax system to reduce inequalities, whilst also offering new methods for measuring tax policy in subsequent research. As such, it will appeal both to scholars of social science and policy makers with interests in economics, social inequality, public policy and international political economy.

This truly indispensable book from Nexia International condenses the KEY rates, reliefs and tax facts from 80 regimes into one essential guide.It's an accessible and user-friendly first point of reference for accountants, tax advisers, policy-makers, investors looking at opportunities overseas and anyone considering living or working abroad.Each chapter covers a single jurisdiction and includes information on: - Legal Forms - Corporate Tax - Personal Tax - Withholding Taxes - Indirect TaxesEach country-specific chapter is organised and presented in the same format and style. With an emphasis on tax planning, Federal Taxation of Wealth Transfers: Cases and Problems integrates stimulating problems with statutes, regulations, and cases to create a highly teachable and student-friendly casebook. This casebook emphasizes problem solving, statutory construction, and policy-analysis skills, and is ideal for 2- or 3-credit courses in estate and gift taxation. The Fourth Edition has been updated to incorporate the 2012 American Taxpayer Relief Act provisions and the final portability regulations. It offers new case law, analyses and problems regarding private annuities, net gifts, and ascertainable standards. The text has been expanded to feature new cases, administrative rulings, and studies. Existing cases and text have been edited or deleted to highlight essential themes. The casebook is logically organized but its flexible organization accommodates reorganizing material to fit individual course structures, and could be used for a basic wealth transfer tax class or to complement either a wills and trust course or an estate planning course.
