A Beginner's Guide to Local Chicken Farming + eBook

Indigenous chicken farming has been described variously as backyard poultry rearing, rural poultry production or scavenging. For our purpose, any flock of chicken that are kept under free-range management and on which no selection of breeds or improvement by crossbreeding has been done is considered as a flock of indigenous chicken. Indigenous chicken lay between 8 and 15 eggs per clutch depending on availability of feed. They are broody and hatch about 80% of the

Technical Note Series - YATMACK INC

Indigenous chicken production systems are mostly based on the local scavenging domestic fowl (*Gallus domesticus*), which predominates in African villages. Sometimes the productivity of these birds is very low, but with proper management practices indigenous chicken can become very productive and have a very good potential for improving the income of the owners.
