Master the evergreen traffic strategies to fill your website and funnels with your dream customers in this timeless book from the \$100M entrepreneur and co-founder of the software company ClickFunnels. The biggest problem that most entrepreneurs have isn't creating an amazing product or service; it's getting their future customers to discover that they

even exist. Every year, tens of thousands of businesses start and fail because the entrepreneurs don't understand this one essential skill: the art and science of getting traffic (or people) to find you. And that is a tragedy. Traffic Secrets was written to help you get your message out to the world about your products and services. I strongly believe that entrepreneurs are the only people on earth who can actually change the world. It won't happen in government, and I don't think it will happen in schools. It'll happen because of entrepreneurs like you, who are crazy enough to build products and services that will actually change the world. It'll happen because we are crazy enough to risk everything to try and make that dream become a reality. To all the entrepreneurs who fail in their first year of business, what a tragedy it is when the one thing they risked everything for never fully gets to see the light of day. Waiting for people to come to you is not a strategy. Understanding exactly WHO your dream customer is, discovering where they're congregating, and throwing out the hooks that will grab their attention to pull them into your funnels (where you can tell them a story and make them an offer) is the strategy. That's the big secret. Traffic is just people. This book will help you find YOUR people, so you can focus on changing their world with the products and services that you sell.

Public trust in the once powerful institutions of the News Establishment is declining. Sharing, curating and producing news via social media channels may offer an alternative, if the difficult process of verification can be mastered by social journalists operating outside of the newsroom. Navigating Social Journalism examines the importance of digital media literacy and how we should all be students of the media. Author Martin Hirst emphasizes the responsibility that individuals should take when consuming the massive amounts of media we encounter on a daily basis. This includes information we gather from online media, streaming, podcasts, social media and other formats. The tools found here will help students critically evaluate any incoming media and, in turn, produce their own media with their own message. This book aims both to help readers understand the current state of news media through theory and provide practical techniques and skills to partake in constructive social journalism.
