Q. "How do I measure the length of my pull-out KWC handset (just the handset, not the entire spout) to determine if I need a 4.5-inch or a 6.75-inch sprayhead?" A. The handsets are measured from the threaded end (where your hose screws on) to the tip of the spout, so you should be able to determine the spout you need by unscrewing it from the hose and measuring it from end to end (either 4.5 ...

This thought-provoking collection of magical texts from ancient Egypt shows the exotic rituals, esoteric healing practices, and incantatory and supernatural dimensions that flowered in early Christianity. These remarkable Christian magical texts include curses, spells of protection from "headless powers" and evil spirits, spells invoking thunderous powers, descriptions of fire baptism, and even recipes from a magical "cookbook." Virtually all the texts are by Coptic Christians, and they date from about the 1st-12th centuries of

the common era, with the majority from late antiquity. By placing these rarely seen texts in historical context and discussing their significance, the authors explore the place of healing, prayer, miracles, and magic in the early Christian experience, and expand our understanding of Christianity and Gnosticism as a vital folk religion.

Drowning in \$20,000 of credit card debt, shopaholic Karyn Bosnak asked strangers for money online -- and it worked! What would you do if you owed \$20,000? Would you: A) not tell your parents? B) start your own website that asked for money without apology? or C) stop coloring your hair, getting pedicures, and buying Gucci? If you were Karyn Bosnak, you'd do all three. Karyn started a funny yet honest website, www.savekaryn.com, on which she asked for donations to

But after four months of Internet panhandling and selling her prized possessions on eBay, her debt was gone! The book has been divided into sections, making it easy to find related subjects in a single category. The book not only details DIY electronic circuits for home construction but also inspiring ideas for projects you may want to design from the ground up. Because software in general and microcontroller programming techniques in particular have become key aspects of modern electronics, a number of items in this book deal with these subjects only. Like its predecessors in the 300 series, "308 Circuits" covers the following disciplines and interest fields of modern electronics: test and measurement, radio and television, power supplies and battery chargers, general interest, computers and microprocessors, circuit ideas and audio and hi-fi.

This book is dedicated to Aristid Lindenmayer on the occasion of his 60th birthday on November 17, 1985. Contributions range from mathematics and theoretical computer science to biology. Aristid Lindenmayer introduced language-theoretic models for developmental biology in 1968. Since then the models have been customarily referred to as L systems. Lindenmayer's invention turned out to be one of the most beautiful examples of interdisciplinary science: work in one area (developmental biology) induces most fruitful ideas in other areas (theory of formal languages and automata, and formal power series). As evident from the articles and references in this book, the interest in L systems is continuously growing. For newcomers the first contact with L systems usually happens via the most basic class of L

systems, namely, DOL systems. Here "0" stands for zero context between developing cells. It has been a major typographical problem that printers are unable to distinguish between 0 (zero) and 0 (oh). Thus, DOL was almost always printed with "oh" rather than "zero", and also pronounced that way. However, this misunderstanding turned out to be very fortunate. The wrong spelling "DOL" of "DOL" could be read in the suggestive way: DO L Indeed, hundreds of researchers have followed this suggestion. Some of them appear as contributors to this book. Of the many who could not contribute, we in particular regret the absence of A. Ehrenfeucht, G. Herman and H.A. Maurer whose influence in the theory of L systems has been most significant.
