There are three basic rigid transformations: reflections, rotations, and translations.

Reflections, like the name suggests, reflect the shape across a line which is given.

Transformations

Transformations are described as the movement of a line, point, or object within a coordinate plane. The four main types of

Transformations are translations, reflections, rotations, and dilations.

Generally,  
Transformations are

Download

Ebook Lesson

One-Digit Tran  
sformations  
Lesson Notes

best solved using a grid or coordinate plane because they provide accurate referencing when moving an object, line, or point.
