Photography Dslr Photography Secrets And  
Different light sources create a variety of color casts in our photos, not all of which look very natural. DSLR cameras have white balance settings to choose from to help counteract these problems. Some of the most common white balance settings are Auto, Daylight, Shade, Cloudy, Tungsten, Fluorescent and Flash.

If you're new to photography, the exposure triangle is the first thing you need to understand. It's the foundation for understanding how to use your dslr camera. Every camera (even your camera phone) utilizes three elements – Shutter Speed, Aperture, and ISO – and balances them to create an "exposure," or image.
