"This program helps students unlock the meaning of over 60% of the words they encounter in the classroom and beyond with a systematic approach to teaching vocabulary using Greek and Latin prefixes, bases, and suffixes. Students are introduced to one new root per lesson with daily activities to ensure that they learn the root and the many English words it generates. The teacher's guide includes lesson plans with detailed notes about words from each root, overhead transparencies for introductory activities, standards-based connections, and differentiation strategies."--Publisher website.

This revised edition offers 200 puzzles for home or school! Learn science terms, build a solid science foundation, and exercise your higher-level thinking skills with these fun-to-do, and often challenging, science puzzles. This book covers life science, earth science, physical science and the human body. Answers are provided.

The Teacher's Guide includes lesson plans with detailed notes about words from each root, overhead transparencies for introductory activities, standards-based connections, and differentiation strategies. A resource CD is also included with 50 bonus activities to support a variety of learning styles.

"With a solid foundation of basic science knowledge and a basic understanding of concepts and vocabulary, students will be prepared for higher-order thinking and inquiry-based activities"--Back cover.

Study biotic and abiotic Ecosystems presented in a way that makes it more accessible to students and easier to understand. Discover the difference between Producers, Consumers and Decomposers. Look at evolving populations, change in Ecosystems, Food Chains and Webs. Understand what and why we classify what is Photosynthesis and how the water cycle interacts with man to microorganisms. An ecosystem is a group of things that work and live together in an environment. Our resource provides ready-to-use information and activities for remedial students using simplified language and vocabulary. Ready to use reading passages, student activities and color mini posters, our resource is effective for test prep, whole-class, small group and independent work. All of our content is aligned to your State Standards and are written to Bloom's Taxonomy and STEM initiatives.

Students will become aware of aquatic ecosystems facing severe change around the globe. Our resource focuses on recognizing how climate change and human activities are affecting their delicate balances. Become an ecologist and list factors in an aquatic ecosystem as biotic or abiotic. Visit an aquatic ecosystem near your home and learn as much as you can through careful observations. Find out why some aquatic organisms have a hard time adapting to climate change. Explore the effects of human activity on aquatic ecosystems. Spend some time at your local aquarium to be a part of the aquatic ecosystem. Get a sense of what's to come as you look at the rate of extinction of marine species. Find out what we can do to restore aquatic dead zones. Written to Bloom's Taxonomy and STEAM initiatives, additional hands-on activities, graphic organizers, crossword, word search, comprehension quiz and answer key are also included.

Find out why water is essential for life on Earth with our Water Conservation 3-book BUNDLE. Start by examining the water we drink with Fresh Water Resources. Build a greenhouse to see firsthand how climate change can affect fresh water. Describe how the water supply in a village could become unfit for drinking in a scenario. Next, see how climate change affects the oceans we fish with Ocean Water Resources. See how the water cycle explains why most of Earth's salt water is found in the oceans. Make your own salt water to represent Earth's oceans and experience what it would be like to visit them. Finally, visit the lakes and streams we enjoy with Waterway Habitat Resources. Become an ecologist and list factors in an aquatic ecosystem as biotic or abiotic. Find out why some aquatic organisms have a hard time adapting to climate change. Each concept is paired with hands-on activities. Written to Bloom's Taxonomy and STEAM initiatives, additional graphic organizers, crossword, word search, comprehension quiz and answer key are also included.

The new SCIENCE WORKBOOK entitled: "SCIENCE AROUND THE KITCHEN TABLE" was written by a Science Teacher with many years of science teaching experience and a Masters higher degree in Science Education. The WORKBOOK is written for the following groups of pupils: * YEAR 7 and YEAR 8 as a Homework / After school Workbook * Low level S.E.N. Year 9 pupils * It could also be used effectively for a SCIENCE CLUB ADVANTAGES: There are activities and experiments which use the minimum amount of equipment. There is a Teacher's Guide and short notes on theory included in each chapter. FURTHER COPIES: These can be purchased from http://www.lulu.com

This is the chapter slice "We Recycle Cans, Trees Recycle Carbon Gr. 5-8" from the full lesson plan "Reducing Your School's Carbon Footprint". Bring climate change to the classroom by teaching students about their school's carbon footprint. Our resource helps students determine their school's carbon footprint and what they can do to make it smaller. Identify fossil fuels used at school and how they make your life more convenient. Brainstorm ways to reduce energy used in your school. Recognize the benefits of adding idle-free zones to your school. Explore events in the history of a slice of bread that caused the emission of greenhouse gases. Calculate the amount of carbon dioxide trees would remove from the atmosphere if they were planted around the perimeter of your school. Complete a project that will lead to a reduced school footprint. Find out how carbon offsets help reduce a school's carbon footprint. Written to Bloom's Taxonomy and STEAM initiatives, additional graphic organizers, carbon footprint calculator, crossword, word search, comprehension quiz and answer key are also included.
