Physically Based Rendering Third Edition
Physically Based Rendering: From Theory
to Implementation, Third Edition,

describes both the mathematical theory
behind a modern photorealistic rendering
system and its practical implementation.

Through a method known as 'literate
programming', the authors combine human-
readable documentation and source code
into a single reference that is specifically
designed to aid comprehension.

The ideas and software in this book show the reader how to design and employ a full-featured rendering system capable of creating stunning imagery. The author team of Matt Pharr, Greg Humphreys, and Pat Hanrahan garnered a 2014 Academy Award for Scientific and Technical Achievement from the Academy of Motion Picture Arts and Sciences based on impact the first and second editions of the book had on how movies are made.
