Simple Boiler Design

Simple Boiler Construction. The pressure vessel for the steam plant was designed to operated at 30psi and provide the oscillating steam engine project with enough steam for 15 to 20 minutes of run time. Ultimately the steam plant was to be used in a model boat and so the firebox housing was designed to

Where To Download Plans For Model Steam Boiler

I read about this in a book titled "Making Simple Model Steam Engines". I annealed the end plates on top of my kitchen stove, and supplemented the burners with a propane torch. I used a 1 Ton arbor press to form the end caps, annealing after each press and then trimming the excess with a band saw and belt sander.
