QUANTUM MECHANICS

$l(l+1)\hbar^2 - m^2\hbar^2 = \hbar^2/4$, which is to say, $l^2 + l + 1/4 = m^2$,
or $(l + 1/2)^2 = m^2$, or $l = |m| - 1/2$. [Our present equation
depends only on m^2 , and hence is the same for either sign, but
the solution to Problem 4.39 assumed $l + 1/2 > 0$ (else u is not
normalizable), so we need $|m|$ here.] Quoting 4.39: $E = (j$.

Quantum Mechanics McIntyre Solutions

This innovative new text approaches Quantum Mechanics in a manner more closely aligned with the methods used in real modern physics research. Most texts start with a bit of history and then move directly to wave-particle problems with the incumbent heavy mathematical analysis; McIntyre, Manogue, and Tate aim to ground the student's knowledge in experimental phenomena and use a more approachable, less intimidating, more powerful mathematical matrix model.
