Shop Class as Soulcraft: An Inquiry Into the Value of Work ...

Shop Class as Soulcraft brings alive an experience that was once quite common but now seems to be receding from society — the experience of making and fixing things with our hands. Those of us who sit in an office often feel a lack of connection to the material world, a sense of loss, and find it difficult to say exactly what we do all day.

" Shop Class as Soulcraft is a unique combination of memoir and philosophical inquiry that examines how we understand and give value to work...[Crawford] levels the playing field, in a sense, by turning the stratification of the working world upside-down and provoking readers to reflect upon the value of the lives they live eight hours a day, five days a week."—

Shop Class as Soulcraft — Matthew B. Crawford

Shop Class as Soulcraft Anyone in the market for a good used machine tool should talk to Noel Dempsey, a dealer in Richmond, Virginia. Noel's bustling warehouse is full of metal lathes, milling machines, and table saws, and it turns out that most of it is from schools. eBay is awash in such equipment, also from schools.

Shop Class as Soulcraft - The New Atlantis

Shop Class as Soulcraft: An Inquiry into the Value of Work, published in 2009, is an often personal and meditative pitch for a cultural recommitment to the vocational arts. As a mechanic with a doctorate in philosophy, author Matthew B. Crawford has lived both lives—that of the “knowledge worker” of white-collar culture and that of the manual laborer who solves the problems society faces on a daily basis.

Matthew B. Crawford

Matthew B. Crawford's Shop Class as Soulcraft is that kind of book, a prophetic and searching examination of what we've lost by ceasing to work with our hands-and how we can get it back. During this time of cultural anxiety and reckoning, when the conventional wisdom that has long driven our wealthy, sophisticated culture is foundering amid an economic and spiritual tempest, Crawford's liberating volume appears like a lifeboat on the horizon."

" Shop Class as Soulcraft is easily the most compelling polemic since The Closing of the American Mind. Crawford offers a stunning indictment of the modern workplace, detailing the many ways it deadens our senses and saps our vitality. And he describes how our educational system has done violence to our true nature as 'homo faber'.

It is "knowing how" that matters to mechanics, as Crawford demonstrates via an anecdote involving his former shop mate, Tommy. At his new place of employment, Pro Class Cycles, Tommy is forced to answer to the intellectual technology that tells him when there is a problem with an engine.

A philosopher and mechanic extolls the virtues of manual labor, describing how the satisfactions and challenges of creating with one's own hands promotes a sense of connection to life that office work suppresses.

A philosopher and mechanic extolls the virtues of manual labor, describing how the satisfactions and challenges of creating with one's own hands promotes a sense of connection to life that office work suppresses.

A philosopher/mechanic's wise (and sometimes funny) look at the challenges and pleasures of working with one's hands Called "the sleeper hit of the publishing season" by The Boston Globe, Shop Class as Soulcraft became an instant bestseller, attracting readers with its radical (and timely) reappraisal of the merits of skilled manual labor. On both economic and psychological grounds, author Matthew B. Crawford questions the educational imperative of turning everyone into a "knowledge worker," based on a misguided separation of thinking from doing. Using his own experience as an electrician and mechanic, Crawford presents a wonderfully articulated call for self-reliance and a moving reflection on how we can live concretely in an ever more abstract world.

A groundbreaking new book from the bestselling author of Shop Class as Soulcraft In his bestselling book Shop Class as Soulcraft, Matthew B. Crawford explored the ethical and practical importance of manual competence, as expressed through mastery of our physical environment. In his brilliant follow-up, The World Beyond Your Head, Crawford investigates the challenge of mastering one's own mind. We often complain about our fractured mental lives and feel beset by outside forces that destroy our focus and disrupt our peace of mind. Any defense against this, Crawford argues, requires that we reckon with the way attention sculpts the self. Crawford investigates the intense focus of ice hockey players and short-order chefs, the quasi-autistic behavior of gambling addicts, the familiar hassles of daily life, and the deep, slow craft of building pipe organs. He shows that our current crisis of attention is only superficially the result of digital technology, and becomes more comprehensible when understood as the coming to fruition of certain assumptions at the root of Western culture that are profoundly at odds with human nature. The World Beyond Your Head makes sense of an astonishing array of common experience, from the frustrations of airport security to the rise of the hipster. With implications for the way we raise our children, the design of public spaces, and democracy itself, this is a book of urgent relevance to contemporary life.

From the author of the landmark Shop Class as Soulcraft, a brilliant, first-of-its-kind celebration of driving as a unique pathway of human freedom, one now critically threatened by automation. "A thoughtful, entertaining, and substantive work about the joys of driving." —Wall Street Journal Once we were drivers, the open road alive with autonomy, adventure, danger, trust, and speed. Today we are as likely to be in the back seat of an Uber as behind the wheel ourselves. Tech giants are hurling us toward a shiny, happy "self-driving" future, selling utopia but equally keen to advertise to a captive audience strapped into another expensive device. Are we destined, then, to become passengers, not drivers? Why We Drive reveals that much more may be at stake than we might think. Ten years ago, in the New York Times-bestselling Shop Class as Soulcraft, philosopher-mechanic Matthew B. Crawford—a University of Chicago PhD who owned his own motorcycle shop—made a revolutionary case for manual labor, one that ran headlong against the pretensions of white-collar office work. Now, using driving as a window through which to view the broader changes wrought by technology on all aspects of contemporary life, Crawford investigates the driver's seat as one of the few remaining domains of skill, exploration, play—and freedom. Blending philosophy and hands-on storytelling, Crawford grounds the narrative in his own experience in the garage and behind the wheel, recounting his decade-long restoration of a vintage Volkswagen as well as his journeys to thriving automotive subcultures across the country. Crawford leads us on an irreverent but deeply considered inquiry into the power of faceless bureaucracies, the importance of questioning mindless rules, and the battle for democratic self-determination against the surveillance capitalists. A meditation on the competence of ordinary people, Why We Drive explores the genius of our everyday practices on the road, the rewards of "folk engineering," and the existential value of occasionally being scared shitless. Witty and ingenious throughout, Why We Drive is a rebellious and daring celebration of the irreplaceable human spirit.

In this moving account, Peter Korn explores the nature and rewards of creative practice. We follow his search for meaning as an Ivy-educated child of the middle class who finds employment as a novice carpenter on Nantucket, transitions to self-employment as a designer/maker of fine furniture, takes a turn at teaching and administration at Colorado's Anderson Ranch Arts Center, and finally finds a school in Maine: the Center for Furniture Craftsmanship, an internationally respected, non-profit institution. Furniture making, practiced as a craft in the twenty-first century, is a decidedly marginal occupation. Yet the view from the periphery can be illuminating. For Korn, the challenging work of bringing something new and meaningful into the world through one's own volition – whether in the arts, the kitchen, or the marketplace – is exactly what generates the authenticity, meaning, and fulfillment for which many of us yearn. This is not a "how-to" book in any sense. Korn wants to get at the why of craft in particular, and the satisfactions of creative work in general, to under-stand their essential nature. How does the making of objects shape our identities? How do the products of creative work inform society? In short, what does the process of making things reveal to us about ourselves? Korn draws on four decades of hands-on experience to answer these questions eloquently, and often poignantly, in this personal, introspective, and revealing book.

What makes a man? This is a question many men in our society today do not feel equipped to answer, because they were never initiated into manhood themselves. They do not know how to pass on authentic manliness to their sons, so boys get stuck in unending adolescence. Everyone suffers from the resulting crisis of male immaturity, and we see its effects everywhere in our society. Leaving Boyhood Behind shows how we can actually do something to address this crisis. Author Jason Craig, cofounder of Fraternus, a Catholic mentoring program for boys, walks through each stage of initiation into manhood, helping readers understand: • What rites of passage are and why they are necessary for men • Christ's own rites of passage and initiation • What it means for a young man to put away childhood • The importance of belonging vs. isolation in the life of men • The important role both mothers and fathers place in initiation • Discipline and the masculine identity • Living the ultimate rite of passage, and much more "This book is an invaluable resource for all Catholics who care about the intellectual, physical, and spiritual development of the next generation of men." — Deacon Harold Burke-Sivers, author of Behold the Man: A Catholic Vision of Male Spirituality

Why do some jobs offer fulfillment while others leave us frustrated? Why do we so often think of our working selves as separate from our 'true' selves? Over the course of the twentieth century, we have separated mental work from manual labour, replacing the workshop with either the office cubicle or the factory line. In this inspiring and persuasive book, Matthew Crawford explores the dangers of this false distinction and presents instead the case for working with your hands. He brings to life the immense psychological and intellectual satisfactions of making and fixing things, explores the moral benefits of a technical education and, at a time when jobs are increasingly being outsourced over the internet, argues that the skilled manual trades may be one of the few sure paths to a good living. Drawing on the work of our greatest thinkers, from Aristotle to Heidegger, from Karl Marx to Iris Murdoch, as well as on his own experiences as an electrician and motorcycle mechanic, Crawford delivers a radical, timely and extremely enjoyable re-evaluation of our attitudes to work.

In a provocative challenge to Republican conventional wisdom, two of the Right's rising young thinkers call upon the GOP to focus on the interests and needs of working-class voters.Grand New Party lays bare the failures of the conservative revolution and presents a detailed blueprint for building the next Republican majority. Blending history, analysis, and fresh, often controversial recommendations, Ross Douhat and Reihan Salam argue that it is time to move beyond the Reagan legacy and the current Republican power structure. With specific proposals covering such hot-button topics as immigration, health care, and taxes, Grand New Party shakes up the Right, challenges the Left, and confronts the changing political landscape.

A celebration of craftsmanship, teamwork, and the relationship between contractor and client. "An enriching and poetic tribute to manual labour."—Karl Ove Knausgaard Making Things Right is the simple yet captivating story of a loft renovation, from the moment master carpenter and contractor Ole Thorstensen submits an estimate for the job to when the space is ready for occupation. As the project unfolds, we see the construction through Ole's eyes: the meticulous detail, the pesky splinters, the problem solving, patience, and teamwork required for its completion. Yet Ole's narrative encompasses more than just the fine mechanics of his craft. His labor and passion drive him toward deeper reflections on the nature of work, the academy versus the trades, identity, and life itself. Rich with descriptions of carpentry and process, Making Things Right is a warm and humorous portrayal of a tightknit working community, a story about the blood, sweat, and frustration involved in doing a job well and the joys in seeing a vision take shape.
