IMO sales no.: T113E.

This study guide has been produced to complement the training text, Marine Fire Prevention, Fire-fighting, and Fire Safety, published by the U.S. Department of Transportation, Maritime Administration. Although the basic principles in marine fire-fighting have not changed, this study guide offers up-to-date information for a better understanding of the principles and the methodologies involved. In addition, this study guide includes all the contents required for a U.S. Coast Guard-approved marine fire-fighting course, as well as meets all the competencies for the International Convention for the Standards of Training, Certification, and Watchkeeping (STCW), per the latest 2010 Manilla amendments. Moreover, this study utilises current-day examples, equipment, and techniques, breaking down the text into twelve easy-to-follow lessons: basic shipboard fire-fighting organisation and safety, causes of fires and methods of prevention, theories of fire, combating fire, extinguishing agents, extinguishing appliances, fire detection systems, fixed fire extinguishing systems, safety and fire-fighting equipment, and respirators and the self-contained breathing apparatus. These lessons will provide the students the knowledge to not only successfully fight shipboard fires, but prevent such fires and in doing so, keep his/her ship and all that ply the seas onboard safe.

Sales number: TB703E.

The Command Companion of Seamanship Techniques is the latest work from the well-respected marine author, D J House. It contains all the information needed for command posts at sea. · All aspects of shipboard management are discussed, with special emphasis placed on health and safety. · Guidelines on how to respond to accidents and emergencies at sea · Contains the most recent SOLAS revisions and a discussion of marine law to keep you up to date with the latest rules and regulations. In order to aid learning, the book includes a number of worked examples in the text along with questions and answers at the end of chapters. The author tells you how to respond to accidents and emergencies at sea, in the event, for example of cargo contamination, collision, loss of stability due to cargo shift and damage due to flooding, fire plus loss of life/crew. In addition, the SOLAS revisions and a discussion of marine law is included to keep you up to date with all the latest rules and regulations. In order to aid learning, this book will include a number of worked examples in the text along with questions and answers at the end of chapters. D J House is senior lecturer in Nautical studies at the Nautical college, Fleetwood. His sea-going experience includes general cargo, reefer, bulk cargo, passenger and liner trades, underwater operations, and roll-on/roll-off ferries. He is a well-known marine author and has written Seamanship Techniques Volumes 1 and 2 (combined) and he has revised Cargo Work in the Kemp & Young series.

This new manual is set to become the standard reference aboard all large yachts.

This publication on Bridge Resource Management - Teamwork and Leadership (BRM-TL) covers the non-technical skill requirements of a bridge-team as

Read Book Stcw Advanced Fire Fighting Manual

specified in the IMO's STCW Tables A-II/1 and A-II/2 for both operational and management levels (including 2010 Manila Amendments). The book is meant to support a simulator-based course covering these requirements. On completion of the BRM-TL course, as detailed in this book, participants are expected to gain enhanced knowledge in the areas of effective management and optimum utilisation of all resources, required for the safe and successful conduct of a ship's voyage. BRM-TL course emphasises the non-technical skills of the bridge-team, which include managing human factors, effective communications, processes of team-building and leadership. To manage bridge processes, the book provides guidance on situational awareness, including team situational awareness, decision-making, contingency planning, as well as task management covering fatigue and workload planning. Additionally, this book introduces the concept of behavioural markers for assessing these soft skills to establish performance levels during a simulated exercise. Examples of behavioural markers applicable in a full-mission simulator-based exercise are also included.

This course should be taken by every prospective seafarer. It covers training in personal survival techniques and is based on the provisions of table A-VI/1-1 of the STCW Code.
