Supported Device List | Genetec

An IP camera is a type of digital video camera that sends and receives data through the Internet. And each camera needs a unique IP camera address, so that you can find it, view it, and manage it on the Internet. And generally, there are two ways for the CCTV cameras to get their IP addresses on the local network.

How to Find IP Camera Address & Set up Remote Viewing ...

There are over 2,500 manufacturers of IP cameras globally - not to mention all current and previous models, so we have listed our most popular brands and models as below. These cameras are currently supported for direct stream mode and most IP cameras are supported in FTP upload mode. Most current HD cameras and NVRs are compatible with the ONVIF standard. Mangocam supports ONVIF compatible cameras (for MPEG4, H.264, H.265 HEVC via RTSP).

Find Out Which Cameras are Supported by Mangocam

Real-time Transport Protocol (RTP) and Real Time Streaming Protocol (RTSP) allow for the direct video feed capture from network surveillance video IP-cameras. RTSP provides unprecedented ease of implementation and has been embraced by nearly every mainstream IP-camera manufacturer in the market. Since RTSP URLs are not standardized, we provide IP-camera manufacturers the ability to support end users by providing the details of each IP-camera manufacturers' RTSP URL addresses for known IP ...
