The Study of Root Mean Square (RMS) Value Mechanical, Electrical, Electronics Engineering

INTRODUCTION The root mean square value of a quantity is the square root of the mean value of the squared values of the quantity taken over an interval.

The RMS value of any function $y=f(t)$ over the range $t=a$ to $t=b$ can be defined as:
$$\text{RMSvalue} = \sqrt{\frac{1}{b-a} \int_a^b y^2 dt}$$

Aeroponics is the ideal tool for the study of root morphology. The absence of aggregates offers researchers easy access to the entire, intact root structure without the damage that can be caused by removal of roots from soils or aggregates. It's been noted that aeroponics produces more normal root systems than hydroponics.
