The result of extensive scholarship and consultation with leading scholars, this text introduces students to twenty-four theorists and compares and contrasts their theories on how we develop as individuals. Emphasizing the theories that build upon the developmental tradition established by Rousseau, this text also covers theories in the environmental/learning tradition.

The result of extensive scholarship and consultation with leading scholars, this text introduces students to twenty-four theorists and compares and contrasts their theories on how we develop as individuals. Emphasizing the theories that build upon the developmental tradition established by Rousseau, this text also covers theories in the environmental/learning tradition.

This book covers twenty-two theories of development and their implication on education. It also introduces readers to the theorists behind the theories in a lively and easily accessible manner. Comparing and contrasting the theories covered, the book focuses on theorists who follow the developmental tradition of Rousseau - such as Gesell, Piaget, and Montessori - and their belief that we grow largely from our inner promptings and spontaneous discoveries at different times throughout our lifetimes. In addition, the author looks at theorists in the environmental/learning tradition. For anyone interested in the philosophy of child rearing and education, relative to a child's growth and the growth of our society as a

The result of extensive scholarship and consultation with leading scholars, this text introduces students to twenty-four theorists and compares and contrasts their theories on how we develop as individuals. Emphasizing the theories that build upon the developmental tradition established by Rousseau, this text also covers theories in the environmental/learning tradition.

For undergraduate/graduate courses in Theories of Development, Child Development, Child Psychology, Human Development, and Lifespan Development. The result of extensive scholarship and consultation with leading scholars, this classic text introduces students to twenty-four theorists and compares and contrasts their theories on how we develop as individuals. Emphasizing the theories that build upon the developmental tradition established by Rousseau, this text also covers theories in the environmental/learning tradition.

A classic in the field, this third edition will continue to be the book of choice for advanced undergraduate and graduate-level courses in theories of human development in departments of psychology and human development. This volume has been substantially revised with an eye toward supporting applied developmental science and the developmental systems perspectives. Since the publication of the second edition, developmental systems theories have taken center stage in contemporary developmental science and have provided compelling alternatives to reductionist theoretical accounts having either a nature or nurture emphasis. As a consequence, a developmental systems orientation frames the presentation in this edition. This new edition has been expanded substantially in comparison to the second edition. Special features include: * A separate chapter focuses on the historical roots of concepts and theories of human development, on philosophical models of development, and on developmental contextualism. * Two new chapters surrounding the discussion of developmental contextualism—one on developmental systems theories wherein several exemplars of such models are discussed and a corresponding chapter wherein key instances of such theories—life span, life course, bioecological, and action theoretical ones—are presented. * A new chapter on cognition and development is included, contrasting systems' approaches to cognitive development with neo-nativist perspectives. * A more differentiated treatment of nature-oriented theories of development is provided. There are separate chapters on behavior genetics, the controversy surrounding the study of the heritability of intelligence, work on the instinctual theory of Konrad Lorenz, and a new chapter on sociobiology. * A new chapter concentrates on applied developmental science.

A focus on the developmental progress of children before the age of eight helps to inform their future successes, including their personality, social behavior, and intellectual capacity. However, it is difficult for experts to pinpoint best learning and parenting practices for young children. Early Childhood Development: Concepts, Methodologies, Tools, and Applications is an innovative reference source for the latest research on the cognitive, socio-emotional, physical, and linguistic development of children in settings such as homes, community-based centers, health facilities, and school. Highlighting a range of topics such as cognitive development, parental involvement, and school readiness, this multi-volume book is designed for educators, healthcare professionals, parents, academicians, and researchers interested in all aspects of early childhood development.

The social and economic systems of any country are influenced by a range of factors including income and education. As such, it is vital to examine how these factors are creating opportunities to improve both the economy and the lives of people within these countries. Socio-Economic Development: Concepts, Methodologies, Tools, and Applications provides a critical look at the process of social and economic transformation based on environmental and cultural factors including income, skills development, employment, and education. Highlighting a range of topics such as economics, social change, and e-governance, this multi-volume book is designed for policymakers, practitioners, city-development planners, academicians, government officials, and graduate-level students interested in emerging perspectives on socio-economic development.

The third edition of "Concepts and Theories of Human Development" describes and critically evaluates - through the lens of developmental systems theories - the key conceptual issues and theoretical approaches to understanding human development across

Montessori: A Modern Approach has been called the single best book for anyone -- educator, childcare professional, and especially parent -- seeking answers to the questions: What is the Montessori method? Are its revolutionary ideas about early childhood education relevant to today's world? And most important, especially for today's dual-career couples. Is a Montessori education right for my child? Paula Polk Lillard writes both as a trained educator and as a concerned parent -- she has many years as a public school teacher, but it was her enthusiasm for the education her own child experienced in a Montessori school that led her to become a leading voice in the Montessori movement in this country. Her book offers the clearest and most concise statement of the Montessori method of child development and education available today.
