methods site understanding and to safety levels acceptable to society, will therefore vary between different regions. The challenge in geotechnical engineering is to make use of worldwide geotechnical experience, established over many years, to aid in the development and harmonization of geotechnical design codes. Given the significant uncertainties involved, empiricism and engineering

Every new president raises many questions in the public mind. Because Barack Obama was a relative newcomer to the national political scene, he raised more questions than most. Would he prove to be a pragmatic centrist or would his politics of hope ultimately flounder on the rocky shoals of America's deep political divisions? What of his

leadership style? How would the uncommonly calm character he demonstrated on the campaign trail shape Obama's political style as commander-in-chief? Based on extensive biographical, psychological, and political research and analysis, noted political psychologist Stanley Renshon follows Obama's presidency through the first two years. He digs into the question of who is the real Obama and assesses the advantages and limitations that he brings to the presidency. These questions cannot be answered without recourse to psychological analysis. And they cannot be answered without psychological knowledge of presidential leadership and the presidency itself. Renshon explains that Obama's ambition has been fueled by a desire for redemption—his
