Volvo D7C Engines have been in operation since early 2000s and were a very popular engine throughout europe, with use in Volvo B7L buses. These engines can be converted to truck specification, the long motors are the same however, youll need a donor engine to complete the conversion. The turbo assy, cooling assy, sump and flywheel housing are the key differences. Many customers have purchased these engines for us in the FL7 trucks ranging between 2001-2004.

Volvo D7C Bus Specification Engine - F&J Exports Limited

Volvo originally lacked the resources to develop their own diesel engines. To fill the gap, the 3610 cc 4D "Dorset" OHV diesel inline-four engine built by Ford for their Fordson Major tractor was used, beginning in 1963. It was installed in the Volvo 425 (Snabbe) and the 435 (Trygge) until 1966, when a more powerful Perkins unit replaced it ...

List of Volvo Trucks engines - Wikipedia

D3, D4, D5 are straight diesel engines by Volvo, equipped with a modern common rail fuel injection system and a turbocharger. The first generation D5 engine was unveiled in 2001, the second generation was presented in 2005, the third generation has been produced since 2009.
